

personalized learning experience for all your students

Millions of students and teachers across the globe are using Read&Write to improve student literacy and language outcomes across all subjects and grade levels.

Available for:

What is Read&Write?

Read&Write is a software toolbar that helps students create and access content with the literacy support features needed to deliver a personalized learning experience - **helping every member of the class** meet their full potential.

Read&Write is great for all subjects and lesson plans. Use it with virtually any kind of classroom content: websites, ePubs, PDFs, Google Docs, and more! The software is simple to install, easy for students to use independently, and works smoothly across all of your school's hardware, including PCs, Macs, Chromebooks and tablets.

Great for assessments

“Read&Write has been a game changer for our district. Teachers that are currently using G Suite in their classrooms love that Read&Write is right there in the student’s browser. (And) we have made district assessments web-based for students who receive accommodations for reading.”

**Kathleen Receveur, Education Technology Teacher,
Jefferson County Public Schools (KY)**

who does it help?

Read&Write offers support for all students in your class, especially the following:

- ✓ Give your **English Language Learners** the support they need to understand the content of every lesson as well as their peers.
- ✓ Help **students with learning disabilities** (those that require IEPs or post-secondary Student Services) express themselves with dramatically increased fluency and confidence.
- ✓ **Emerging and struggling readers** gain motivation and support to make tangible leaps and bounds forward.
- ✓ **Students with dyslexia and other literacy challenges** that require an exam reader can use Read&Write's Text to Speech to help make the content more accessible and inclusive. A great alternative to human readers, saving on extra staffing costs, and providing a less stressful testing environment.

and exams

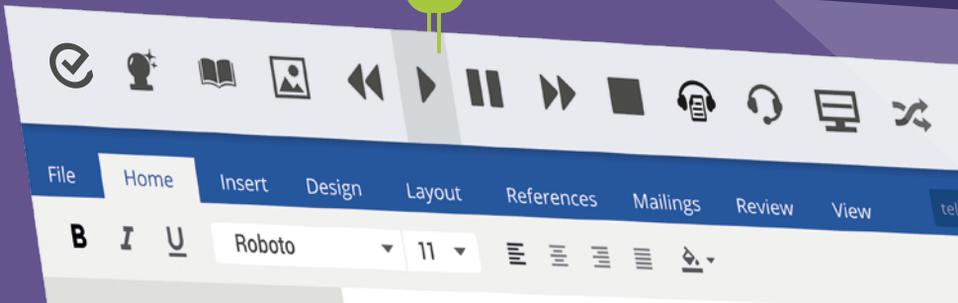

what does it do?

Reading and writing tools

- ▶ Text to Speech reads words, passages, or whole documents aloud with easy-to-follow dual color highlighting.
-  Text & Picture Dictionaries provide definitions and displays images from Widgit® Symbols.
-  Talk&Type turns the spoken word into text.
-  Check It reviews writing for incorrect grammar, spelling (phonetic), capitalization, punctuation, verb tense, homophones and more.

- ✓ Easy deployment for your IT Department
Works across all subject and content areas
- ✓ Improves literacy levels across your school/district
- ✓ Helps educators focus their time where it's needed

hear what other Schools are saying...

"The Read&Write suite helps reduce barriers associated with inaccessible content for any student within Loudoun County Public Schools in a manner that fosters flexibility, engagement, and inclusivity. Read&Write is a cornerstone application across all laptops, Chromebooks and iOS tablets, which are the primary district-supported platforms for delivering an enriched curriculum to LCPS students."

**Mark Nichols, Special Education Supervisor
of Assistive Technology, Vision, and DHH,
Loudoun County Public Schools (VA)**
